Brian Berg & Associates, Ltd. proudly presents our new name: **berg engineering consultants, ltd.**, which better represents who we are, what we do and why we exist. We look forward to continuing our legacy into the future.

berg – It is not about one person anymore and it has not been so for a long time. It is about one person's vision continued by successors dedicated to that vision. That vision created an engineering company that maintains high standards of professional competence and ethics; an engineering company of individuals working as a team challenging each other; an engineering company that strives each day to provide innovative and affordable solutions to any building system design. This is who we are.

engineering – The application of science and mathematics by which the properties of matter and the sources of energy in nature are made useful to man in structures, machines, products, systems and processes. This is what we do.

consultants – We provide our professional expertise in building systems to all who need it. This is why we are here.
